Education

Marmara University (GPA: 3.22/4)
Computer Engineering - English (Faculty of Engineering)

Istanbul, Turkey
08/2021 - 08/2025

Experience

VeriUs AI
- Machine Learning Engineer

Istanbul, Turkey
07/2024 - Present

- Core developer for a Law Chat Application; engineered async FastAPI backend services, including a secure file extractor and an Azure-based mail service managing distinct rate limits across multiple priority queues.
- Architected the AI orchestration layer for the Law Chat Application using LangChain, implementing advanced prompting techniques and custom system prompts to drive agentic workflows.
- Served as Sole Backend Engineer for a Medical Assistant Application; built the full REST API, webscraped medical guideline data for retrieval, and implemented RAG pipelines using Elasticsearch.
- Optimized LLM performance by replacing language modeling heads with classification heads, reducing latency by 91% and GPU costs by 8x while improving accuracy on evaluation sets.
- Managed end-to-end MLOps on Azure/Linux servers using VLLM/TGI, Docker Compose, and Swarm; implemented cascade classification for toxicity and language detection.
- Led a team of 5 interns, managing code reviews, Jira workflows, and conducting technical training on DevOps and Generative AI concepts.

BigDataLab (Marmara University)
- Research Assistant & Lab Administrator

Istanbul, Turkey
01/2024 - 07/2024

- Led a research team to modify Llama architecture for Turkish NER token classification, achieving state-of-the-art benchmark results; published and presented findings at SIU 2025.
- Configured and administered the central GPU server infrastructure, performing multi-GPU hardware installation and Ubuntu Server setup; managed user privileges and disk allocation.
- Served as a generative AI consultant for Medical Graph-RAG implementation, contributing and co-authoring a paper published at INISTA 2025.

ATP
- Software Engineer Intern

Istanbul, Turkey
08/2023 - 12/2023

- Contributed to large-scale backend API development using Java SpringBoot and Maven within an Agile sprint workflow.
- Participated in developing a mail service utilizing Kafka queues for asynchronous messaging and handling.
- Executed database management tasks and optimizations using SQL.

Publications

- Tuncer, Y., "New Approaches to Named Entity Recognition in Turkish: Improving Performance through Architecture Modification of Causal Large Language Models", 33rd Signal Processing and Communications Applications Conference (SIU 2025). ([IEEE Link](#))
- Co-Author, "Medical Graph-RAG: Bilingual Graph-Based Reasoning for Cardiological Intelligence", International Symposium on Innovations in Intelligent Systems and Applications (INISTA 2025). ([IEEE Link](#))

Skills

Technical: LLM Fine-tuning/Training, RAG Pipelines, Microservices, Docker, Linux System Administration, Git, DevOps, Signoz, Azure, LangChain.

Languages: Turkish (Fluent), English (Fluent), French (Intermediate), German (Basic), Italian (Basic).

Programming Languages: Python, Java, SQL, JavaScript, Bash, C, Lua.

Frameworks & Libraries: FastAPI, SpringBoot, PyTorch, Transformers, VLLM, Elasticsearch, Kafka, Redis, PostgreSQL, ChromaDB, FAISS, BeautifulSoup.

Volunteering

English Speaking Class Host

- Host weekly English speaking classes to assist learners in improving conversational skills.
