Experience

VeriUs AI

- Machine Learning Engineer

Istanbul, Turkey

07/2024 - Present

- Core developer for a law chat application: engineered async FastAPI backend services hosted on Azure, and developed the LangChain-based agentic AI layer with custom system prompting.
- Lead developer for a medical assistant application: built the full REST API, webscraped medical guideline data for retrieval, and implemented RAG pipelines using Elasticsearch.
- Optimized LLM performance by replacing language modeling heads with classification heads, reducing latency by 91% and GPU costs by 8x while improving accuracy on evaluation sets.
- Managed end-to-end MLOps on Azure/Linux servers using vLLM/TGI, Docker Compose, and Swarm.
- Led a team of 5 interns, managing code reviews, Jira workflows, and conducting technical training on DevOps and Generative AI concepts.

BigDataLab (Marmara University)

Istanbul, Turkey

- Research Assistant & Lab Administrator

01/2024 - 07/2024

- Led a research team to modify Llama architecture for Turkish NER token classification, achieving state-of-the-art benchmark results; published and presented findings at SIU 2025.
- Configured and administered the central GPU server infrastructure, performing multi-GPU hardware installation and Ubuntu Server setup; managed user privileges and disk allocation.
- Served as a generative AI consultant for Medical Graph-RAG implementation, contributing and co-authoring a paper published at INISTA 2025.

ATP

Istanbul, Turkey

- Software Engineer Intern

08/2023 - 12/2023

- Contributed to large-scale backend API development using Java SpringBoot and Maven within an Agile sprint workflow, including a Kafka-based asynchronous mail service.
- Executed database management tasks and optimizations using SQL.

Education

Marmara University

Istanbul, Turkey

M.Sc. in Computer Engineering (Expected 09/2028)

09/2026 - Present

Marmara University (GPA: 3.22/4)

Istanbul, Turkey

B.Sc. in Computer Engineering - English (Faculty of Engineering)

08/2021 - 08/2025

Publications

- Tuncer, Y., “New Approaches to Named Entity Recognition in Turkish: Improving Performance through Architecture Modification of Causal Large Language Models”, 33rd Signal Processing and Communications Applications Conference (SIU 2025). ([IEEE Link](#))
- Co-Author, “Medical Graph-RAG: Bilingual Graph-Based Reasoning for Cardiological Intelligence”, International Symposium on Innovations in Intelligent Systems and Applications (INISTA 2025). ([IEEE Link](#))

Projects

Home LLM

[Website](#) | [Github](#)

React, TypeScript, FastAPI, PostgreSQL, Redis, Docker

- Engineered a full-stack LLM platform integrating local GPU and cloud models, featuring Redis-backed stream routing and custom JWT-authenticated response streaming.
- Designed the FastAPI/PostgreSQL backend with Alembic migrations and admin-controlled usage limits, paired with a React/TypeScript/Zustand frontend, actively deployed for personal use.

Sakinfan.com

[Website](#) | [Github](#)

FastAPI, SQLAlchemy, PostgreSQL, Docker

- Rebuilt a legacy 2009 community forum, engineering an asynchronous FastAPI backend with Jinja2 server-side rendering to support 100 concurrent users.
- Secured sessions with Cloudflare Turnstile and CSRF middleware and containerized deployment with Uvicorn and Nginx behind Cloudflare Tunnels.

Skills

Technical: LLM Fine-tuning/Training, RAG Pipelines, Microservices, Docker, Linux System Administration, Git, DevOps, Azure, LangChain, Signoz.

Languages: English (Fluent), Turkish (Fluent), French (Intermediate).

Programming Languages: Python, Java, SQL, JavaScript, Bash, C.

Frameworks & Libraries: FastAPI, SpringBoot, PyTorch, Transformers, vLLM, Elasticsearch, Kafka, Redis, PostgreSQL, ChromaDB, FAISS.
